ABSTRACT	KEYWORDS
Current in the day countries of the economy development and integration , qualified and competent to personnel has been of demand increased to go as a result education field efficient development and to the field investments active attraction reach important importance occupation is doing Developed countries education field active respectively by developing growing up is coming In our article education field in development abroad experience , developed countries education to the field attraction being carried out investments, them attraction doer factors , them development ways about thought we walk With that together studied data education to the system apply and to practice current reach ways about info giving let 's go.	Investment, education system, study, education to the field attraction done investments, foreign education investments.

Introduction:

Technician in terms of investment the term work release assets reserves joining process as is determined this buildings , plants and equipment such as main tools buy to receive own into take can _ Investments , as well as education through in the organization there is a person resources quality improve for money to spend own into take can _

Present in the day of countries development and progressive to be done fast in pictures done increase as a result worker to power , wider by doing so to speak competent worker to power The demand is strong increased is going Of this as a result all countries their own education system one until upgrade and is trying to develop . This one how much roads with done increase can _ Of them the most effective ones and the ones you need two big to the group separate can _ *Education system development internal sources* , to these state subsidies through training system reform do , in the country personnel encourage and scientific to the activity exclamation point actions the total organize reach etc enters _ The second *education field development external sources* to these foreign investments education to the field active attraction do , foreign authoritative universities branches to open , students and employees teaching and qualification increase for abroad to study to send through them knowledge , skill and qualifications increase such as input can _

Education service show is a field, because it is labor to the market and in the end to the economy contribution adding knowledgeable men and women to cultivate intended . Any _ in economics a person

resources development for in charge that account if we can , to education investment input a person capital to form investment input with is equal to To education investment input a lot in forms to be possible , that's it including business initiative as schools organize reach and manage and physical of individuals the work with supply prospects and income get opportunities increase for any _ certain kind of to education have to be Government , as well as national development for important calculated a person of capital certain type to develop investment input can _

Literature Review

Investment in the field of science attraction being carried out investments on the subject books not so much a lot not _ However some one of scientists thoughts and their research analysis by doing by learning exit important and important. In our country our economists Karlibayeva Raya Khojabaevna his " Investments organize reach and financing " in the book " Intellectual investment personnel preparation, scientific inspection, education and another in appearance intellectual to potentials investors to put all kind of are riches . Work science of release and technique effect getting stronger to go with intellectual of investments importance more increased will go _ those who passed Intellectual of property development country development main important unit is counted. In the country How a lot scientific activity busy with and potential personnel share high if that's all intellectual there is also a lot of property will be

With that together in our article many içojodchi of scientists thought and from the comments we used in particular I. S. Tukhliev, M. E. Polatov , J. R. Zaynalov, M. M. Muhammedov , D. X. Aslanova such as of economists scientific from work was used .

Research Methodology

In research information collection, analysis to do and methods used. Data analysis and synthesis do, scientific abstraction, economic and mathematician modeling methods used without theoretical descriptions work developed _

Analysis and Results

The majority education our future for the most strong investment to recognize as agree will be Studies that's it shows that education people in his life constant to changes take coming possible and this not only people for maybe _ countries is also useful for To education investment input not only right step , maybe this smart economy ¹. of the country of the next 50 years life present is studying a day and growing up coming out of personnel potential part _ In the country training in the field to be done reforms of the country the future for being done is a reform let's say not mistaken we will be Current in the hun abilities known in the country field and busy on the net that's it field or network for , of the field development for service does _ That's why we are talim our industry by developing our people potential if we increase all field and of networks in dependence development provided we will be

In the country state education institutions and private education institutions number increase they are in the middle competition environment forming education of quality to improve take will come That's why on the network competition environment formation education institutions in the middle student and students to themselves attraction reach about they compete .

In the country efficient staff form take to go for many cases to ensure necessary _ In the country my training by developing qualified personnel preparation the following necessary a must conditions through more as a topical issue puts :

- In the country social the field development;
- In the country available the work instead of competition durable staff delivered to give
- Jahan is a worker power in the market competitive personnel delivered to give and integration in the process to advantage have to be
- Country development and to development to reach prospects provide for _
- In the country training system of the world developed countries training to the system rotate for

. of the country main from problems one this population social protection to do is counted . of the population less provided part market economy in the system to the defense needs is counted . Market of the economy main disadvantages one of the population stratification is counted . Of this eliminate of reaching main from the roads one this of the population main part education with cover get is counted . To education have has been people life forgiveness and good to live according to skill and skills formed will be and this condition their poor being to stay probability reduces _ That's why state in the budget from funds big part education to the field investment to do to the goal according to will be Each _ in the country available work release and service show in the field many workers activity walks _ This area and of the network development in the field activity walking of employees qualification and the work to the experience depend _ Staff qualification increase and them competent frame by doing bring up country in front of important from issues one is counted . In the country this things done increase and them in practice apply for different kind of business centers and start ups organization matured many to young people occupation from secrets lessons giving is going State this about their work done increase and such projects done increase for state investments attraction reach and them right orientation it is necessary

Current in the day developed countries economy work release and service show fields organize is doing And this that's it of workers employed in the field potential depends developed countries of workers employed in the industry authority very high is counted . them teaching and qualification increase development according to many affairs done is increasing. In countries work release and service show in the fields high the work of the right to be given of workers that's it to the field more attempt and that's it to the field work want increases . Of this as a result countries between migration relations is formed and development finds _ Of this positive side in the country available worker to the power request has been to areas of workers from abroad come their performance and this spend expenses to decrease take will come With that together negative sides are also available this love between difference because of smart of workers from the country out to go take will come And this in the country potential personnel decreased to go take will come That's why state workers qualification increase and them occupation qualifications shaping according to internal and foreign investments active attraction reach and the field development it is necessary With that together countries organize being carried out international joint enterprises and in organizations working employees number increase that's it the country of workers potential to increase take will come

Country main budget funds training to the field to spend and that's it with together foreign investments attraction reached education to the system spend to do of the country issicadi and political potential development big effect shows. With that together training in the system foreign technology and

techniques apply and education in the system foreign of states advanced education institutions with integration connections provision is important indicator and qualifications foreign education from the gallows learning opportunity means _

Conclusions and offers:

Summary in place telling transition should be training to the system being done investment suddenly himself the result does not give However of the country upcoming in his life of the country development and progressive when it comes important importance occupation is enough With that together of the population marriage well-being increase and poverty shorten according to the most efficient from solutions one is counted . To education done investment the following cases his own the effect that he gave let's see possible:

- In the country poor and social to the defense needs population number decreased on the way
- Economical of fields growth and the work efficiency significant level in the increase;
- of the country education system, training to their countries, Khatiji countries and organizations by interest to be notified and they are with cooperation contracts to compose has been of demand in the increase .
- In the country industry and service show of the fields progressive reach and on the rise.
- Country of students foreign competition and in contests occupying of seats getting better on the way and that's it with together many so indicators counting transition can _

Of these all of it training to the field being done of investments how much important that it is proof gives _
