### Introduction

In The Hague, for more than a hundred years, the judiciary has been on the verge of collapse: the economy, the modernization of science and culture, as well as the modernization of science and culture, has led to a deep globe-shaped jungle that reveals the associated objective historical tendencies. In Natija, an'annavian elements and g'arabic innovations were shattered by the new form of property that they had united. One of the most important aspects of The Watchtower's socio-economic development is the socio-economic development of the Sabiabid and the emphasis on the right alchemy is significant, and this factor is based on the side of many g'rb scientists. (Matthew 24:14; 28:19, 20) Today, The Watch Tower Publications Index and the New York's Witnesses have been published. In the mid-19th century, The Watch Tower Publications Publications Guide for Jehovah's Witnesses were published, to account for the economic well-being of the country, to ensure the integrity of export-import operacy, and to promote cooperation improving growth, investment and export efficiency, improving the quality of life of the population, and improving the quality of life of the population. In today's globe, which is rapidly changing the atmosphere of the Khalaro svdo environment and internal affairs, the pride in responding to this transformation is a bubble in the Republic of Uzbekistan and in the foreign advanced state-of-the-art bojxona The priority of strengthening the role of the bojxon government in our orchid era, the study of advanced technologies and innovative aspects of foreign states, and the introduction of ulrnia in the national anthelm has been a priority. In the meantime, we

have made it possible for us to study the philosophy of the Bojxon service in the valley of Jacob, and to address the success of the great-grandson to the national anthome.

In the last hundred years, the use of tomato imports and export duties in the kunchik country has been attributed to several thousand years of age. Specifically, in 1633, after the Tokugavian dynasty began its syogunligi and announced the collapse of Japoniya, it was possible to visit the quadruple of the 19th century. The port of Negasaki was open to the czech Republic and the Svdoti for the cylinders and cylinders of the cylinder and the cylinder of the cylinder. But this predicament does not last long. In June 1853, the American Navy, led by commodore Matthew Perry, under the command of the Indian Navy, Urag and the government of Japoniyah, who knew about the entry of commodore Perry's weapons, accepted his sheep's tongue, "Closed door-to-door intelligence " that knows how to sign "The Emperor of Japoniya and the American Sheikh Shtlaari" reached its end. After the G'orrb dwelling, which was successful in forming a shred of peace and friendship, Syogund began to ask Syogund to form a Siberian shredder, which was the main problem of his own, and finally, the AQSH was the first to sign the "Friendship and Svdo Lizard." Following this event, the same shredders were formed, including Golland, Rossius, Great Britain, and France. The opening of four ports in this shrimp was held on the negliguration of the G'Harbor Valley. Ulard also has its own intestinal shrimp, which distorts extrusion and import/export duties. In 1866, the transition to acceptance led the Japoniya government to reduce the duties to a 5 percent administrative station. In the Alps, this pearl-shaped stupen has had a serious impact on the economy. At the same time, The Watch Tower Publications Index and the United Nations Index and the Watch Tower Publications Index and the United Nations Convention on the Elimination of All Forms of Discrimination against Women were initiated. In accordance with the well-signed svdo lizard, ports of Khakodat, Negasaki, Yokohamah, Xyogo, Osak, and Nigeria were opened for the Khaklaro Svdo. The shaft, perhaps made of a view of a tower saw "the one who is walking on a road suddenly finds that it becomes two diverging paths."

After the mamfact was opened, the Meydzi government increased its ability to modernize the property. Specifically, the structure of the "Savdo and Commercial Orientation Discernment" in Great Britain prompted a careful review of the svdo shredder, which is not equal to that of other possibilities. Since a long time ago, the autonomiy, which has been dreaming of a long time ago, was fully restored by 1911.

The resulting embryo was allowed toper inserted into her womb, where it implanted. In each port, the jurisdiction of the Molecular Government was directly under way. By 1897, a number of laws and regulations governing the bojxon were adopted to promote the disciples' disciples, especially the "Law of Bojxon" and "The Law of the Boj. At the same time, the secretary-general, the final department, six divisions, and the number of employees were established in Bojxon, which was located on the 1,240th of July.

Knowing the greatness of the war, Jacob's craftsmanship was shattered in a sensitive drawer. By the month of December 1941, after the war in the Pacific region was fought, Jacoboni's nineteenth-century Assyrian Assyrian, Jubiles, was restricted to Asian prisoners and Manjuria. In an effort to strengthen the hiernal cavity, the bone marrow was reduced to rubble. Thus, in 1943, the Governor-General's Office began to lose its philosophy. The building has stopped its philosophy, and the employees of the great and the building and material objects have been established by the Bureau of Maritime Sports.

In accordance with the fact that the War of peace was fleshly, the Allied forces were on the verge of collapse, Beginning June 1, 1946, Jacobonia was awarded a six-year-ounce [6 m] bojxon, In section 35, 45 tons, and 68 guardian posts began their work. His staff then reached 1779 people.

The Economy of Japoniya began to grow steadily, and Japoniya began to join the economic well-being of the country. In 1955, The Watch Tower Publications Index and the Polo Guide for Jehovah's Witnesses were published. The review of the cathedre has been carried out on the outsourcing of the stock, and the Bojkhona Hospital Nomenclature has been introduced in the aesthetic system to decipher the turf.

On June 15, 1964, the 38th member of the Governing Body of Jehovah's Witnesses (now Jahan Bojxon) was awarded a certificate of award. As he gazed down on the town and the valley that spread out below it on one hand, his heart likely swelled with joy and pride. The Japoniya turf system was introduced in a fully compatible lobby to the Bojxona Civil Engineering Kengashi Nomenklaturasig, And by 1972, The Watch Tower Publications Index and the Polo Guide for Jehovah's Witnesses were added to the Convention on the Elimination of All Forms of Discrimination against Women.

We can see suddenly that this short postwar tribe has been replaced by a jawbone of jawbone in an environment that reaps the jawbone of a jawbone. Bojxon's post-war history shows that in one country, the duty of the bourgeon itself could not have increased its functionality, perhaps because the craftsmanship of the craftsmanship could be increased to a fuller cylinder.

In the midst of a total of 1,000 gallons [1.5 L] of economic disaster, to ensure the integrity of export-import exports, and to promote the economic well-being of the country, increased investment and export semancy, improving the quality of life and quality of life of the population. In today's globe, which is rapidly changing the atmosphere of the Khalaro svdo environment and internal affairs, the pride of responding to this transformation has led to a strengthening of the role of the duties administration in this year. To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared.

This is the Sea portable and the aeroporteur, which captures the life span of The Hague and the life of the people. Bojxon's service stands at the front of this svdo philosophy. Zer·a·ni'ah is a member of the Governing Body of Jehovah's Witnesses, a member of the Governing Body of Jehovah's Witnesses, 1 tons of the Institute of Improvement, 1 tons of The Marquezine Bojxon Lecturer, 189 tons of bourgeon idorators, 120 tons of seaports, and 30 tons of exporters. Today, more than 9,000 bourgeois employees are being serviced in The Hague. The following laws are the main laws governing corporate activities:

- \* The law of the Righteous one
- \* The law on bojxon's translations
- \* The law on the correctness of the translation of the law
- \* The law on the correctness of The Watchtower and Aegean
- \* Law on The Elimination of All Forms of Discrimination against People
- \* The law on the elimination of stimulative drugs
- \* The law on the elimination of nerotics and psychotropic modules
- \* The right law of opium

Today, The Watch Tower Publications Index and the Watch Tower Publications Index are published: Davlat va jamiyat xavfsizligi taminlash.

Zararli buyumlarning Yaponiyaga tovarlar harakatini kuzatish va nahardat. The hotel is located in the heart of the historic centre of the city, close to the historic centre of the city, close to the historic centre of the city. poniya jamiyatining xavfsizligi ta'minl.

Bojxona to'lovlari va soliqlarni to'ri va dolatli tarzda yig'ish.

Proper and fair collection of corporate fees and domestic consumer taxes as a tax collecting agency (about 9.1 trillion), equivalent to almost 14.1% of national tax revenue

Savdo ta'rtib-ta'omillari rini yanada osonlashtirish.

International trade distribution will further facilitate customs procedures in ensuring security and further strengthen the multilateral trading system through trade negotiations such as EPAs.

In accomplishing these three main missions, the Customs and Tariff Bureau sets the following goals:

Installation of modern inspection equipment. To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared.

Cooperation with private enterprises. Development of international trade facilitation by establishing partnerships with private enterprises

Cooperation with foreign customs authorities. Improving the quality of customs operations by strengthening cooperation with foreign customs authorities through mutual assistance agreements in the field of customs

Cooperation with other government agencies. Establishing a strict system of interaction of information with relevant government agencies through close cooperation

further application of ICT. Implement simplified and effective import/export procedures and better services for TIF participants by using advanced innovative technologies for customs clearance systems

Encourage trade negotiations. Simplifying and harmonizing customs procedures, conducting trade negotiations such as EPAs involved in customs cooperation and information exchange

Today kunda Yaponiya bojxona xizmati o'z fahihatini quyidagi normativ hujjatlar orqali amalga increaseadi:

## **XULOSA**

The hotel is located in the heart of the historic centre of the city, close to the historic centre of the city, close to the historic centre of the city. ynida uqorida circular species variable development anish bosqichlaridan passed, today's day agi et ala ko'plab davlatl arga ornak bo'la oladigan innovative bojxona xizmatini shakillantirgan. Today, the main function of the AOPoniya customs service differs from the premises of Uzbekistan, and it is not a fiscal function, but intellectual property rights It is carrying out its tasks of protecting and ensuring the safety of citizens, since the forgotten corporate fees do not constitute a large part of the state budget. During the course of the study, I was convinced that Japan achieved these achievements by developing international cooperation, concluding multilateral agreements with foreign countries, and various by joining trade blocks. We too need to accelerate the process of concluding such multilateral agreements and entering into international trade blocs as much as possible.
