ABSTRACT

The concept of creativity in content (Latin, ing.create – to create, Creative-creator, creative) is the creative ability to develop new ideas, which is part of giftedness as an independent factor that characterizes in practice. The presence of the quality of creativity in a teacher directs his personal abilities, natural and social energy, to a high-quality, effective organization of professional activity. The teacher does not remain a creative person by himself. His creative abilities are formed over a certain period of time through consistent training, work on himself and gradually improve and develop. Creative people stand out from the crowd in every field, in every job they do. Because they do their work not only with great enthusiasm and interest, but also with ideas that usually do not occur to anyone. A teacher is a skilled mentor who is versatile, can pass each lesson in an interesting way, knows new methods and techniques and is equally loved by all students. His lesson should be full of unexpected and strange ideas.

INTRODUCTION

The 3 main qualities that a modern teacher needs are that a teacher working with the younger generation should be ready for.

1. An unexpected gift from the reader to the questions.
2. Recognizing their mistakes, the reader should to orientation.
3. Encourage constant searching and learning is just an example of a teacher who is ready is just an The Tree of Happiness.Olga Darchuk) is just an example of a teacher who is ready to make roars like a tree.

The teacher acts as a developer, researcher, user of new pedagogical technologies, theories.

So that students can learn, their secrets are as follows. Each student has to go through the lesson in different ways. It will depend on the mental state of the student, family circumstances and many other factors. At the same time, it is necessary to recognize the work and the results achieved by the student. It can also be a simple praise and reward. Receiving praise and rewards should not become the reader's

goal. In fact, this should explain to the reader the importance and true purpose of reading. During the lesson, monotony should be avoided, and you can also invite famous people, enterprising entrepreneurs, parents, representatives of various industries. Classes are mainly conducted with real people, professions, heads of enterprises, banks. The lesson may be interesting to students if it is devoted to events on the example of employees, farmers, customs officers, entrepreneurs. The lesson is more interesting in content, it should not turn into a drunkard. All this should remain a secret, inspiring the reader to learn..

For the development of memory and attention of students, it is necessary to pay attention to.

Help students find additional information on the topic-facts, photos and materials. With an individual approach, it will be advisable to conduct a lesson through schematic tempos, comparisons, abbreviations, comparisons, rhymes, sayings of famous people, reflections that make the reader think, gaming activities.

Nowadays, the influence of information technology on students is increasing, and it can range from a limited range of mental influences to a complete transformation of personality (attachment to the Internet, mania of computer programs, hacking syndrome). In the process of production and implementation of modern technologies into practice, the active participation of teachers and psychologists will be necessary. The use of Internet technologies can also have a positive impact on a person's upbringing. When working with the Internet, the activity of students increases, the individualization of the educational process occurs, the authoritarian relationship between teacher and student decreases. Develops the personality of students, there is an incentive to independent thinking, initiative, mobility. But there may be a reverse negative effect.

For example, the strategy of the Indian nation and IT get.

Indians are transferred to senior positions in almost all large OT companies, there are several reasons for this.

1. The Indians realized that it is possible to get out of difficult conditions only with knowledge.
2. Realizing that free education is not enough, parents place bets and place bets on their children's education, even if they spend the last money.
3. Big goals have been achieved, the main goal is to produce mature specialists all over the world, not just in India.
4. Students are taught how to win foreign grants, which ways are the most convenient, the 1st grade child also thinks about which American university can win a grant in the future.
5. Not only education, but also early education of children they are taught to earn money from an age through their knowledge they go. They have a different presentation and softness in the lessons transfer their knowledge and skills to other through the skills manifest.

Write it down in your teacher's side Notebook!

- Even in the anger of a real teacher, affection for the child should be carried through.
- Your student asks you for advice, help in a life issue, so you have reached the level of a mentor.
- Today's crime is a product of yesterday's upbringing.
- We, teachers, should support our students so that they succeed in life, not in school.
- Even the way a teacher takes a step should be education.
- Only a teacher who taught his students trains a specialist.A teacher who teaches his students educates a person.
- Teachers are more excited about the achievements of their students than the achievements of their children.
- If you want to climb high, go down and join the students. The day will come when they themselves will lift you to the top.
- I want my students to love me first of all as a person, not as a teacher.
