In this article, moral values have a continuous history in world culture and history, and are based on the national punishment, men, and thinking of the Uzbek people.	Ethics, human rights and freedom, Ethical Social Services.

Introduction

Morality, that is, human rights and freedom, plays a significant role in one society itself. This roller can be analyzed in various fields:

Ethics is the foundation of the human rights and justice system. This is necessary to ensure that every citizen is treated equally and fairly.

Morality helps to ensure the peace, perfection, and rentable happy life of people in society. Human beings feel cheerful in society on the principles of mutual respect, disrespect, and value to others.

Ethics also plays its role in the field of Economics. It plays its role in protecting human rights in economic activities, ensuring justice and stability in production, working calculations and relations between workers.

In the socio-political system of society, morality helps to strengthen the principles of equal and fair treatment for all classes of people. In a democratic society, the role of morality is very important when people are married to mutual respect, free expression and health with others.

Morality plays a role in the educational system. Teaching people fairness and stability, with the help of making them have spirituality and moral values, is of great importance in increasing spiritual potential in society.

Ethics also plays its role in social services, as well as in the field of health, cultural and social counseling. Consultative assemblies, governing bodies, and social organizations are those designed to protect human rights by following ethics.

An important role of morality in society arises in ensuring a stable, fair and peaceful life for every citizen based on the sources of the average body of men, sex, national, religion, and other divorced life.

Main part:

Uzbekistan is known for its dependence and unique moral values. The moral values of Uzbekistan have a continuous history rich in World Culture and history, based on the National punishment, men, and

thought of the Uzbek people. These moral values affect the society, social life, the system of Public Administration, culture and many other spheres of Uzbekistan.

In the following several points, the role of moral values in Uzbekistan can be noted:

Uzbekistan is at the heart of world history, and therefore has its own national values. The future of the Uzbek people, types of worship, Uzbek language and literature, national costumes, and celebrations represent its moral values.

Islam has a great influence on Uzbek society and includes moral values. In Islam, the principles of human rights, respect for Man, the time of the happy, sadod, and joy are of great importance. The religion of the Uzbek people, in many cases, is based on Islam.

In the Society of Uzbekistan, family values, the formation of a hearth family, cooperation with children, respect for young people and young people are of great importance. Family relationships are expressed through moral values, and the family appears as one of its important forms of elected structure.

The state language of Uzbekistan, Uzbek, its literature and linguistic features, plays a huge role in the expression of moral values. The state of Uzbekistan is conducting multi-layered activities for the independent development of Uzbek language and literature.

Summary

The state of Uzbekistan is conducting multi-layered activities for the protection of moral values in social services. Diplomatic relations with other countries, Uzbekistan entrepreneurship in the international community, the Uzbek and Islamic literature show, events and festivals, and many others are aimed at raising moral values.

In Uzbek society, moral values are based on the principles of peace, cooperation, and protection of human rights among its citizens. Moral values are of great importance in ensuring that citizens in every sector of the country are treated with dignity, friendship, teaching mutual respect and innocence.

Ways to strengthen moral values

Moral values represent the basic standards for the protection of human relations and individual rights in one society. They can be carried out the following ways to strengthen and get into changes:

Strengthening The Education System:

Moral values the first stage of learning can be in the educational system. Educational institutions play a major role in teaching the rights and responsibilities of students, teaching the diverse mutual respect of people, and raising the respect of spirituality.

Education in the field of Media and Communications:

In the field of Media and communications, it is possible to show moral values and management, as well as provide documents on the use of the latest communication technologies, bringing society to respect, peace, and respect for human rights, to show its moral characteristics.

Legal Temporary Rights:

The legal procedure is of great importance for the protection of rights for citizens, the system of fair distribution, the orientation of people to the rights of advice and justice, the strengthening of moral values and other regulatory documents.

Collaborative Events:

Co-operation events at the International and national level play an important role in strengthening mutual cooperation and friendship between countries, in protecting moral values and Human Rights.

Social and cultural events:

In the development of society, social and cultural activities are important in strengthening their moral values. Community-unifying events such as festivals, councils, and sporting events can be effective for raising the veneration of moral values and Human Rights.

Strengthening The Family Education System:

Through the family education system, it is possible to teach family values, human rights and mutual respect, as well as provide an opportunity to act to increase the important contribution of Management in family life and to improve interpersonal relationships.

Strengthening The Righteous Participation Of Citizens In Themselves:

It is important to strengthen the active contribution of citizens to the management of society and the state, and to carry out activities to know their rights and to educate their observance, to introduce moral values and Human Rights.

This constitutes only a fraction of the methods used to strengthen variability in the protection of roads, moral values and Human Rights. In the strengthening of moral values and human rights, it is important that mass, legal, social, and religious events work together.
