Both social of partnership time on demand suitable big features about wide data given passed.	Social work, country, people, attitude, help, life, well-being.

Introduction

Social work is that to people people between relationships solution to do and in society social in changes to help directed, their vital well-being increase in order to help display and support according to professional is an activity. Social the work wide in a sense social event as social of help to himself special is a model. Him of society clearly one historical during social, political and cultural development features suitable respectively come true releases In the narrow sense while social the work social necessary activity to be, people, social to groups personal and social difficulties in overcoming help to give directed. Social the work concept, social of work professional activity type as expanded developed to go society life of activity all to the fields effect pointer intense changes to the period right came Social of problems sharp increase of the population a lot part state by social protection and protection needs being to stay reason it has been.

American professor Charles Zastrov writes: " Social the work to people, families, groups and to societies, their personal, interpersonal, socio-economic and political opportunities their life activity conditions improve at the expense of in raising help show in the process of people right and opportunities to expand directed. the world according to social of work huge experience there is. In our country social the work according to acquired lack of experience it's not. However today's to the day come in our country changed going social situations social the work concept justification and him to practice current to do Demand will be done. Uzbekistan Republic President's " Women and girls support and family institute strengthening in the field activity fundamentally improvement measures about". To the decree according to the population social protection needs layer medical and social help show system more improvement, social of the field management organs for personnel preparation and them of the population certain group with to work specialization, separate customer, customers group (families, women, children, youth, elderly and etc.) with current from tasks one being remains This

is it in the situation social work occupation and as an academic discipline learning very important and efficient the fact that open moon manifestation is happening of the population different layers with social the work take to go their in society life well-being provide, their in his life positive changes done increase, social supply done increase directed is an activity. Social supply the term while wide in a sense of the population well-being to provide directed all organizational problems solution to reach own into takes Social the work and social supply to each other closely depends and mutually equal to is a concept. Education field, health storage field of citizens itself manage bodies, population employment provide, elderly and the children social protection to do, to the population social help show, social insurance, physical and mental defects there is to people service show, social rehabilitation centers such as all of them social supply in turn enters Last in days in our country social the work in the field wide scope affairs done increased To the population complex approach based on professional social services show system current to do in order to Social protection national agency organize done of the agency main of duties one heavy social to the situation fell and drop off danger was population with addressed to work organize from doing consists of and individual approach to 31 categories of the population according to social services neighborhood level organize is enough

In particular:

- old age persons and the elderly;
- others care needs was persons;
- disability was persons;
- less provided families;
- to violence encountered persons;
- disabled their children was to families and of his parents one disabled was children;
- guardianship received families;
- an orphan and a true orphan children;
- separately to education needs persons social help and services with cover is taken . Agency by to the population the following main social services and aids is displayed:
- less provided to families and to mehant incompetent to the population allowances and material aids to give
- the elderly and disability was persons and work veterans for sanatoriums and in boarding houses social services organize reach
- population Prosthetic orthopedics products and rehabilitation technical tools with provision;
- disability was individuals preferential and free of charge stationary treatment provision;
- disability was of individuals alone in order rehabilitation programs work output;

Social of work generalized object (customer) of society social its structure groups and their teams separately their voices is considered Modern Russian in society professional activity as it is different different (traditional and innovative) forms, methods and technologies using done is increased. Social work professional activity type as seeing if we go out, that's it separately to individuals, people groups them protection to do and support through help show through human relationships harmonization to emphasize that the activity can Social work is professional activity being his meaning social relationships in order put them modern civilized society requirements coordination, their rationality,

humanity, subjectivity increase, individuals, groups, ethnic of groups connections from reinforcement consists of Groups, families state and society with, social technologies is the type.

Summary by doing to say possible social the work employee social problems solution in doing differently approaches above telling as passed . Social to the defense needs a person psychological, medical, legal or other different to help needs to be can That's why social for too the work field most of the time psychology and right such as directions with is related . Social the work employee mature frame to be for theoretical knowledge, and practice thorough by learning to go necessary
