

**SOCAL CONDITIONALITY OF ESTABLISHING CRIMINAL LIABILITY FOR ADVERTISING OF NARCOTIC DRUGS, THEIR ANALOGUES OR PSYCHOTROPIC SUBSTANCES, AS WELL AS PREPARATIONS CONTAINING POTENT SUBSTANCES**

Captain Erlan Daniyarovich Baratov

The Leading Legal Consultant of the Legal Support Department of the Organizational Department of the Ministry of Internal Affairs of the Republic of Uzbekistan

ABSTRACT	KEYWORDS
<p>Today, in our society, the Republic of Uzbekistan is addicted to drugs international community to combat illicit trafficking of substances special attention is being paid to the full fulfillment of its obligations. This article is about drug addiction, its negative consequences, and against the scourge of addiction strong legal frameworks developed in our country to fight illuminated.</p>	<p>narcotic drugs, psychotropic substances, international community, illegal circulation, negative consequences.</p>

It should be noted that the Republic of Uzbekistan was united in February 1995 United Nations Convention on Narcotic Drugs of 1961 Convention, 1971 "On Psychotropic Substances" and 1988 "Illegal use of narcotic drugs and psychotropic substances a member of the Conventions on Combating Human Trafficking has been increased. In 1999, the Republic of Uzbekistan "Narcotic drugs and psychotropic" On Substances" was adopted, in accordance with this lawillegal dealing with narcotic drugs and psychotropic substances criminal liability is established against any manifestations of being. Strict measures against drug trade and consumption in our country. Although it is seen, today the illegal circulation of drugs is the most remains one of the dangerous and urgent problems. Drug dealers are a new method and using tricks and continuing to sell killer poison. They are others, who have not yet formed a worldview on the way to the implementation of malicious goals susceptible young people are losing their lives.

Customs in cooperation with law enforcement agencies in Uzbekistan illegal activities of transnational drug gangs by the authorities detection and control, closing of smuggling channels, narcotic plants on the destruction of areas and prevention of the spread of drug addiction special complex operations are being carried out regularly. Drug addiction is a major public concern throughout the world is one of the urgent problems. After all, narcotics and psychotropics of crimes related to illegal handling of substances the level of social danger is very high. Consumption of narcotic and psychotropic substances the increase in the number of serious diseases and crimes in the first place leads to an increase.

Drug addiction is a phenomenon related to crime. First, drugs in order to obtain or to prevent them with serious consequences intentional crimes are committed. Second, the effect of taking drugs under which crimes are often committed.The connection between drug addiction and crime is addiction

offense caused by illegal circulation of means is manifested in the execution of actions. In today's process of globalization, there is a sharp change in various fields of science and technology and economy changes are taking place and these changes are in line with the needs of people to shape their knowledge and skills, and more on themselves encouraging them to work. Some are in trade, some are in IT, some are in science.

In the field of technology and others in the public services in various directions are conducting their activities. As we all know, where there is development, crime also develops there. Who or who committed the crimes and to the question that does not operate in the above-mentioned areas, who do not work on themselves, or if not financially sufficient children of well-off families or financially challenged families crimes of various levels are being committed by some of them in a family way and what is happening is very sad. Today, entrepreneurship is wide at the same time that opportunities are being created, the drug trade is at its peak is coming out. Our government provides halal sustenance to every member of our society. One who is trying to create enough opportunities to work with people. During this period, close relations were established between various drug syndicates and drug markets drug business is becoming transnational.

Today, according to the information provided by various international organizations, land. More than 500 million people use narcotics and psychotropic drugs has been consuming substances.<sup>1</sup> In Uzbekistan, there are about 5 thousand citizens among drug addicts. At the expense of drug addicts 31 percent of the citizens are aged 20-40. According to statistics, drugs are used in spring and autumn or disease complications in persons who abuse psychotropic substances increases, and during this period, the trade of these substances reaches its peak. Addiction the analysis of criminal cases related to the illegal handling of funds shows that 60 percent of this type of criminal acts occur in February-April, 25 percent in September-November, and 15 percent are done in other periods. Currently, the United Nations General Assembly. According to the decision of December 7, 1987, June 26 "International Narcotics Control on" and was announced by this organization as "Narcoticson", "Psychotropic substances" and "Narcotic drugs and psychotropic "Conventions on Combating Illegal Trafficking of Substances" were adopted done Recognizing the generally recognized norms of international law in the Republic of Uzbekistan, on August 19, 1999, the Republic of Uzbekistan The Law "On narcotic drugs and psychotropic substances" was adopted.

According to this law, narcotics and psychotropic substances in our country a number of measures aimed at putting an end to illegal circulation have been implemented is getting married. 368 kg in the territory of our republic in the first 6 months of this year drug trafficking was stopped. In particular, in the territory of Tashkent region a sharp and uncompromising fight against any kind of addiction and that 19,731 special programs aimed at further improving the healthy environment in society preventive measures were carried out and "Safe Zone" "Black drug" rapid preventive Alcohol abuser identified in the course of events or narcotic drugs, psychotropic substances and those affecting the activity of the mind 6835 persons using other substances were identified. Internal in this process. A number of employees of law enforcement agencies showed passion and addiction put an end to the illegal circulation of their means. For example, such a devotee from the staff, preventive inspectors of the IIB HPB of the Chinoz district, lieutenant A. Polvonov measures taken by senior lieutenant N. Nuriddinov within the framework of "Black drug-2021" narcotics, particularly cannabis and marijuana, as a result of the activities "special laboratory" established for cultivation was identified and exposed.

Our people live a free and prosperous life and be satisfied with today at the initiative of the head of our state, a number of ministries and agencies. Some of our weak-willed teenagers are addicted to drugs at the same time as they are working hard. It worries all of us that it is suffering. "Plague of the century" the so-called abominable disease is spreading among young people. It is a sad situation, how many people live peacefully as a result of this families are being destroyed and how many children are orphaned and more how many innocent babies are born with defects. This disgusting disease is as severe and incurable as AIDS, hepatitis, and tuberculosis causing the spread of diseases. Drug addiction in recent years lower age limit for persons addicted to drugs or psychotropic substances It is observed between 17-30 years old and this type of drugs. One of the main reasons for consumption is a person's difficult family conditions being brought up, subjected to humiliation, humiliation, cruel treatment as the main reason for neglect or excessive attention is being displayed. And the youth who are brought up in such conditions are drugs. It will be a good prey for the enterprising businessmen who trade with it.

In conclusion, we can say that today in our country "All the numbers."efforts are being made towards a noble goal called "for human dignity". In this period, our citizens resort to such a disgusting evil. As we mentioned, it can lead to a number of negative consequences for the national and it became clear from the results of the researches of international experts. Nowadays implementation of crime prevention in our society and crime fight against as a task of law enforcement agencies only there are also cases that are being evaluated. In our opinion, prevention of offenses and fight against crime not only law enforcement agencies, but also public organizations and citizens in cooperation with self-government bodies, family and educational institutions activity.
